Date:	<b>Saturday June 8, 2019</b>
Time:	<b>8:30 am to 4:30 pm</b>
Course Fee:	<b>\$349.00 plus HST.</b> Includes light breakfast and lunch
To Register:	Call Central Dental customer service at 800-268-4442

---

Course Limited to 12 Participants

**The Visiolign system** permits dental professionals to enhance the esthetics of dentures as well as perform repairs of acrylic teeth using light curable materials. These same techniques can also be applied to printed dentures and/or printed temporary crowns.

This one day hands-on course will train dental professionals on the use of the Crealign composite materials and accessories; otherwise known as the "Red and White" system. Participants will leave with a complete understanding of the use of the materials and the principals behind their application.

### Course Overview:

- Presentation of the Visiolign system
- Demonstration of the use of crealign composite materials for denture enhancement and tooth repair
- Hands-on use of the material on a demo case
- Assessment of individual work with corrections where applicable
- Lunch
- Demonstration of the finishing stages
- Hands-on workshop on effective finishing of the enhancements
- Demonstration of denture tooth repair
- Hands-on session on the use of Crealign materials for denture tooth repair
