

*“We are pleased to announce that
2017 is our 70th year in business.”*

Thank you to our customers and manufacturing partners for their on going support.

Our mission statement has always remained the same; provide innovative and quality products at a fair price.

We plan to provide special offers during this celebratory year.

When you see the 70th logo beside a product it will signify that the item is a special anniversary promotion.

MULTISIL-SOFT THE PERMANENTLY SOFT RELINING SYSTEM

RELIABLE BONDING

The bonding agent is matched to the bond of denture resin and silicone.

READY-TO-USE

The flow characteristics allow rapid processing and applying through the dosing device.

GRINDABLE

Silicone burs with a special cutting geometry simplify grinding of functional margins and transition zones.

PLAQUE-RESISTANT

Multisil sealing agent avoids the accumulation of plaque to the surface and penetration of bacteria into the surface.

PERMANENTLY ELASTIC

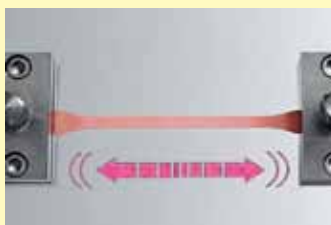

Prolonged comfort of wear is a distinctive feature of the material.

**EXCEPTIONAL
QUALITY**

TEAR-RESISTANT

Highly cured materials create exceptional wear resistance and special tear resistance.

Abraso Star Glaze

High Luster Polishing Paste

High Luster Polishing for Metal High Shine
Paste 2 x 50 ml
520 0016 3

The excellent polishing properties reduce the effort required when polishing with a handpiece.

Abraso Star Glaze creates an optimum high luster quickly and easily.

Special \$35⁸⁶ **SAVE \$18**
Reg. \$53.86

Zi-polish

The perfect mirror polish!

- The high content of diamond particles reduces polishing time and leaves a highly glossy surface
- Special binding agent reduces paste consumption
- Proper wipe off of pre polish residues from dents

Zi-polish
5 g
360 1002 5

Due to a special binding agent the paste sticks to the brush, saving material also.

Perfect and speedy mirror polish is achieved by high diamond particle density.

“Zirconia is zirconia. They’re all the same”.

TRUE or **FALSE?**

FALSE of course!

Dental Direkt Zirconia System

If you’ve worked enough with zirconia you have to agree. Some look better. Some mill better. Some colour better. If you’re struggling and frustrated by damage during milling, inconsistent shading results from disc to disc or so-so esthetic results you owe it to yourself to try German quality zirconia from Dental Direkt.

Dental Direkt means:

- Quality 1st manufacturing processes that ensure the same result from disc to disc
- A wide range of disc translucencies to meet needs in all prosthetic situations
- Class-leading esthetics
- Choice between white and pre-shaded discs – no price difference
- Predictable colouring with the DD Basic and DD Pro Shade water-based systems
- All zirconia types sinter at the same temperature for ease of processing

DD BioZX²

BioZ – high strength – 1200 MPa

cubeX²
cubic zirconia

BioZX2 – high translucency – 1200 MPa

CubeX2 – super high translucency – 720 MPa
