Meet the Team

The Central Dental Digital Specialists

Ria Mozhina, RDT

For years, Ria has been Central Dental's go-to technical design enthusiast and support for digital products. Prior to joining the team, she honed her skills across several areas while gaining her Registered Dental Technician designation, working at a boutique lab and graduating from George Brown College.

Ria has a passion for learning about new digital products and how they work. Helping maximize and streamline clients abilities in the digital world through her on hand experience is what motivates her the most.

Lisa Coffin, DD

With Lisa's background as a Denturist she is able to provide insight and prospective into tackling today's challenges of transitioning from analog to digital denture production.

Lisa is a graduate of Northern Alberta Institute of Technology and has worked in multiple clinics across Canada. Since joining the team in 2022 as Digital Denture Specialist she has provided lectures, training and support across Canada.

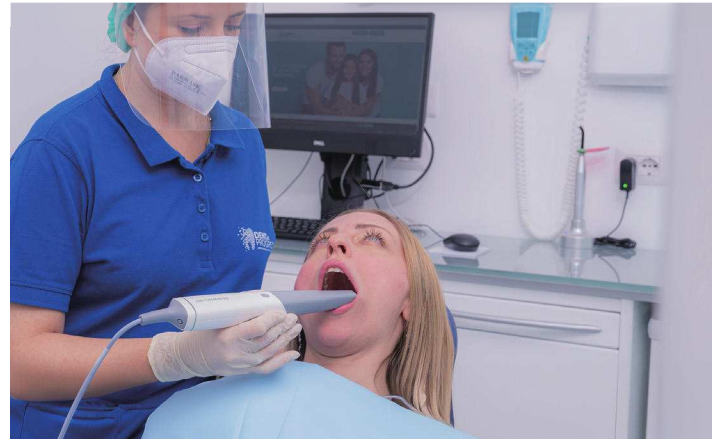

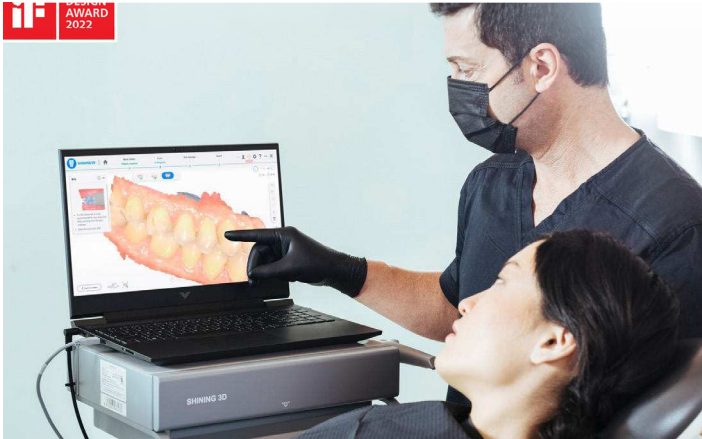

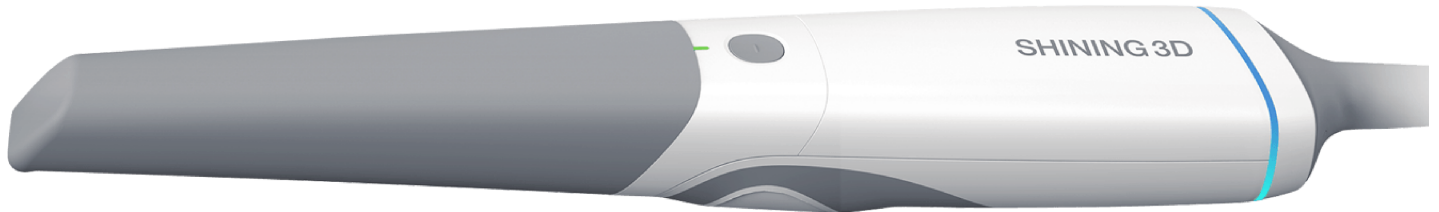

Iain Cunningham

Iain Cunningham is Central Dental's technical support specialist. He has extensive experience with robotics, CNC manufacturing, electronic and mechanical engineering and computer technology. Iain uses his knowledge, persistence and patience to provide technical support and training to customers, sales reps and to the staff at the head office.

Product Spotlight

SPECIAL
OFFER!

Your entry point to digital dentistry

By taking an intraoral scan (creating a stl file) you are starting your journey into the digital world. The creation of the STL file allows you to:

- Export your digital recorded impression to a Dental Labor Milling centre for design & Manufacturing.
- Export your digital recorded impression into your preferred software to start the design process which can then be processed either through 3DPrinting or Milling.

NEW

Rodin™ TITAN

Ceramic Nanohybrid Resin

Introducing **Rodin™ Titan**, Pac-Dent's latest ceramic nanohybrid resin designed for printing long-term full arch restorations and provisional hybrid dentures. Rodin™ Titan preserves the core composition of Rodin™ Sculpture – a class II ceramic nanohybrid with analogous ceramic filler content, but now features a substantially increased flexibility for enhanced impact strength.

FEATURES & BENEFITS

Improved Flexibility

High Impact Strength

Improved Aesthetics

High Fracture & Wear Resistance

Matches Color of Dentition

Optimal Translucency

FDA 510K Cleared & Biocompatible

APPLICATIONS

All on X

Denture Teeth

Veneers

Rodin Titan

- For high impact prosthetic indications: (All on Xs, screw retained dentures, full arch denture teeth)
- Improved Flexibility: Rodin™ Titan features a significantly reduced flexural modulus, providing exceptionally high impact strength
- Rodin Titan features analogous ceramic filler content to Rodin Sculpture
- Class II Ceramic Nanohybrid

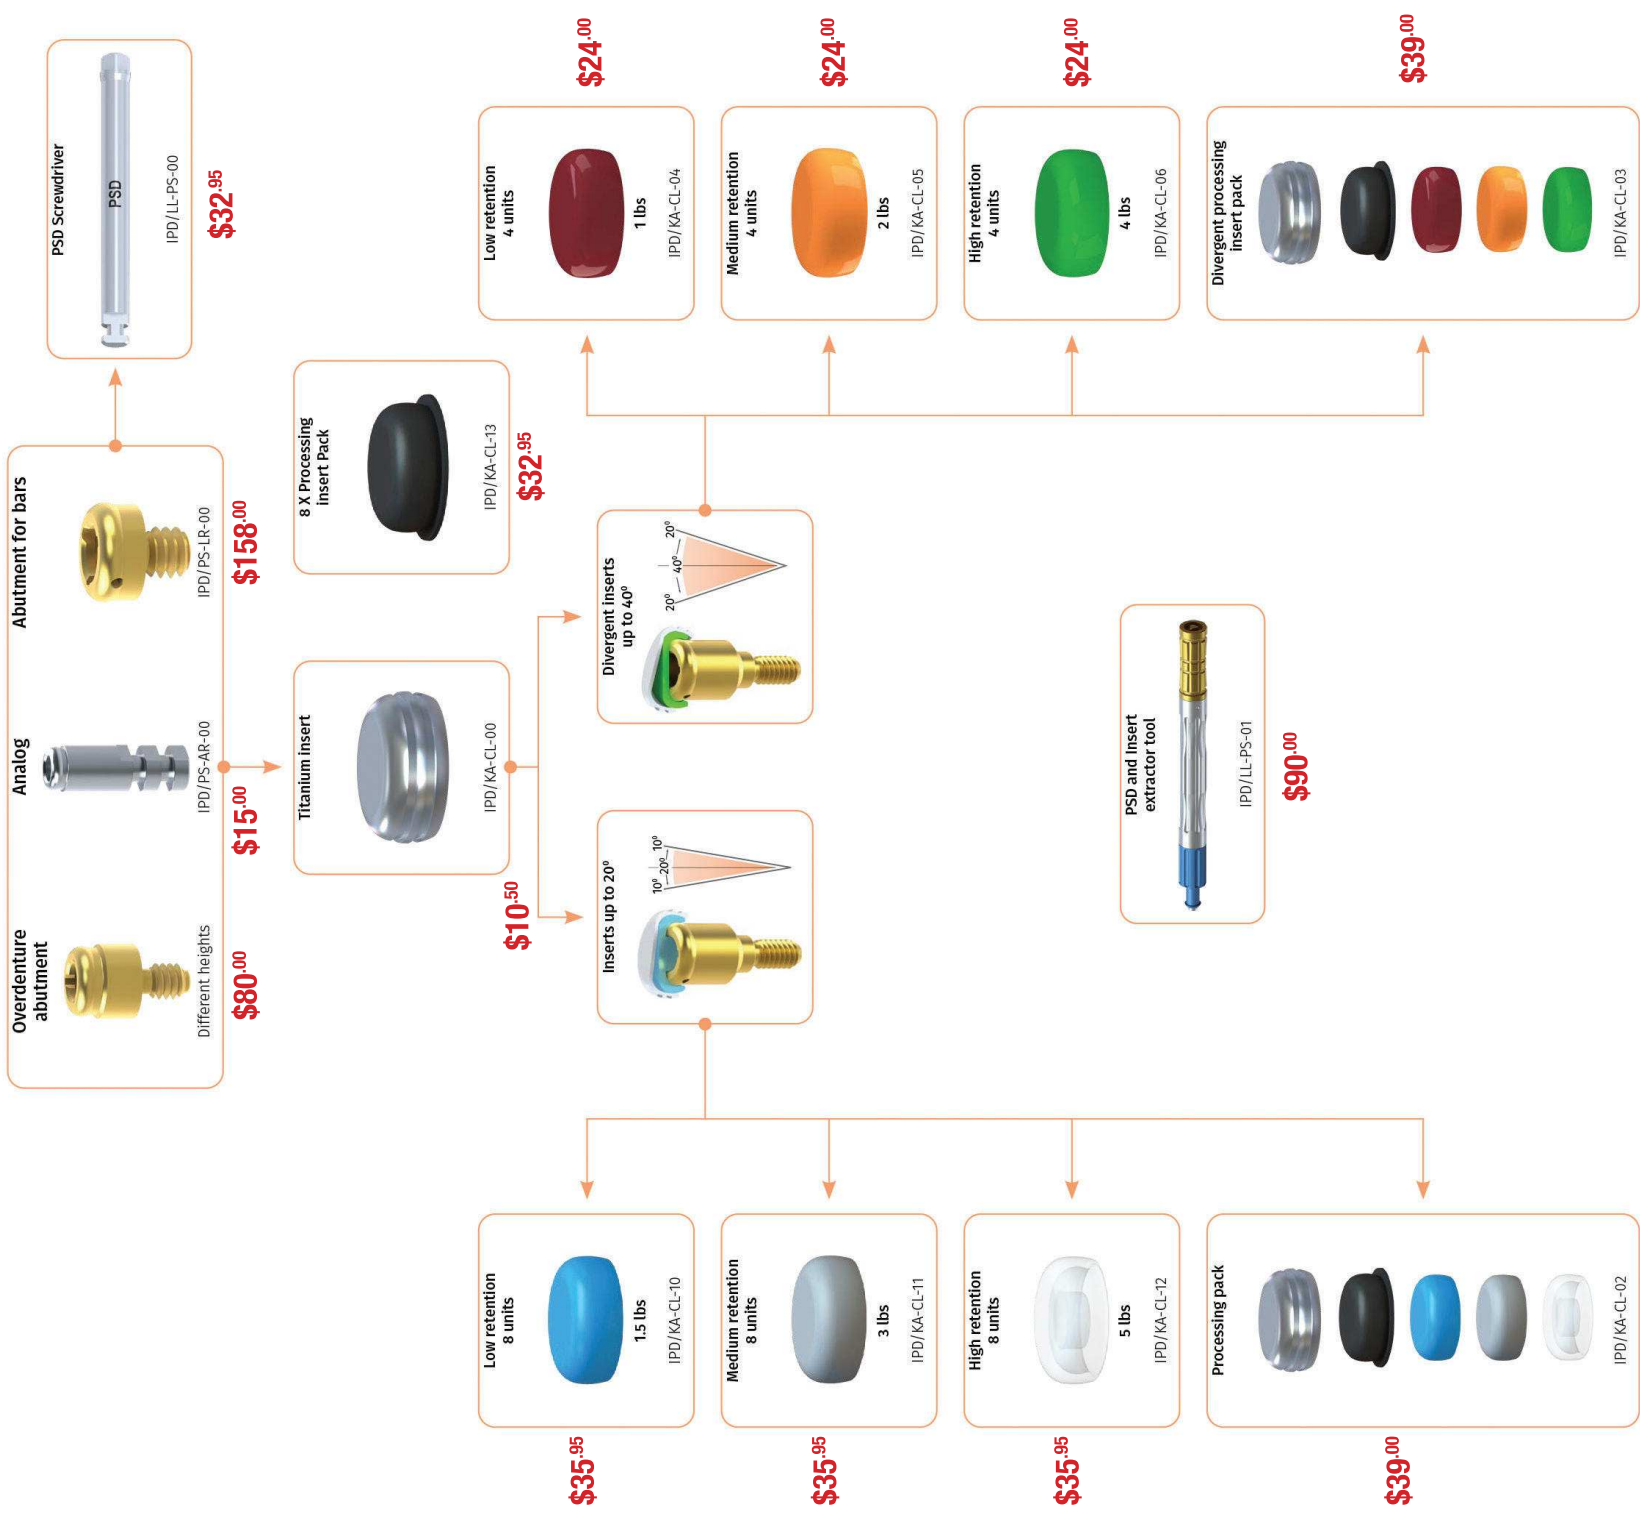

Rodin Sculpture

- For single crowns, inlays, onlays, and veneers, denture tooth arches, all-on-x provisionals
- Rodin™ Sculpture features a Biaxial Flexural Strength of 175 MPa, and a Flexural Modulus of 8800
- Rodin Sculpture consists of over 50% ceramic filler content
- Class II Ceramic Nanohybrid

Rodin Sculpture 2.0

- For temporary and permanent fixed restorations
- Improved Strength: Rodin™ Sculpture 2.0 boasts an impressive Biaxial Flexural Strength of 200 MPa
- Sculpture 2.0 now consists of over 60% ceramic filler content, providing a substantial increase in strength and superior X-ray radiopacity
- Class II Zirconia-Infused Ceramic Nanohybrid
