exocad

FullDenture Module

Digital design of full dentures

Our FullDenture Module provides a guided workflow for designing highly esthetic full dentures, in single or both jaws.

- Perform model analysis digitally to derive automatic full-arch tooth setup suggestions
- Use your choice of production process: two-step milling, printed denture bases or monolithic printed dentures (for example with try-ins)
- Significantly less time for optimal denture setups with exocad generic presets or personal presets

SHINING 3D®

AORALSCAN 3

Meet Aoralscan 3

Empowering a Highly Efficient Digital Chairside Solution

Say hello to SHINING 3D's brand new intraoral scanner, Aoralscan 3! Exceptional, smart and elegant, Aoralscan 3 improves the overall clinical experience. It allows users to easily acquire vivid digital impressions in a faster and more accurate way.

Moreover, Aoralscan 3 comes with a wide range of different intelligent functions, guaranteeing more comfortable chairside experience and efficient clinic-lab collaboration.

- ✓ Brand New Design
- ✓ Fast Speed
- ✓ High Accuracy
- ✓ Powerful AI Process
- ✓ Intuitive Communication

PACKAGE PRICE \$14,995.00

Includes:

- Exocad - full Denture design stand alone module and DB
- Shining 3D - Aoralscan3 Intra Oral Scanner
- 2 Days of Training - Learn how to Scan & Design Full Dentures

NEW

Rodin™ TITAN

Ceramic Nanohybrid Resin

Introducing **Rodin™ Titan**, Pac-Dent's latest ceramic nanohybrid resin designed for printing long-term full arch restorations and provisional hybrid dentures. Rodin™ Titan preserves the core composition of Rodin™ Sculpture – a class II ceramic nanohybrid with analogous ceramic filler content, but now features a substantially increased flexibility for enhanced impact strength.

FEATURES & BENEFITS

Improved Flexibility

High Impact Strength

Improved Aesthetics

High Fracture & Wear Resistance

Matches Color of Dentition

Optimal Translucency

FDA 510K Cleared & Biocompatible

APPLICATIONS

All on X

Denture Teeth

Veneers

Rodin Titan

- For high impact prosthetic indications: (All on Xs, screw retained dentures, full arch denture teeth)
- **Improved Flexibility:** Rodin™ Titan features a significantly reduced flexural modulus, providing exceptionally high impact strength
- Rodin Titan features analogous ceramic filler content to Rodin Sculpture
- Class II Ceramic Nanohybrid

Rodin Sculpture

- For single crowns, inlays, onlays, and veneers, denture tooth arches, all-on-x provisionals
- Rodin™ Sculpture features a Biaxial Flexural Strength of 175 MPa, and a Flexural Modulus of 8800
- Rodin Sculpture consists of over 50% ceramic filler content
- Class II Ceramic Nanohybrid

Rodin Sculpture 2.0

- For temporary and permanent fixed restorations
- Improved Strength: Rodin™ Sculpture 2.0 boasts an impressive Biaxial Flexural Strength of 200 MPa
- Sculpture 2.0 now consists of over 60% ceramic filler content, providing a substantial increase in strength and superior X-ray radiopacity
- Class II Zirconia-Infused Ceramic Nanohybrid

Rodin™ Denture Base Denture Base Resin

Rodin™ Denture Base Resin is designed to be used alongside Rodin™ Titan or Sculpture and is suitable for printing all types of denture bases. Maximizes high-impact durability to match performance of traditional denture acrylics, outperforming all other non-filled denture base resins that may otherwise break upon dropping.

Benefits & Features

High-Impact Strength

Highest Fracture & Wear Resistance

Matches Color of Gingiva

Stunning Aesthetics

FDA 510K Cleared & Biocompatible

VITA VIONIC® SOLUTIONS

Elevate your Digital Dentures

NEW! VITA VIONIC® DENT DISC multiColor

Composite milling disc for high-quality, long-lasting, esthetic denture teeth in a digital workflow

The new milling blank complements the VITA VIONIC portfolio. The VITA VIONIC DENT DISC multiColor is made of anorganically filled PMMA and can create up to 14 unit arches - making it the perfect match for full and partial dentures.

- High quality VITA premium teeth
- Abrasion support for long-lasting dentures
- Excellent polishability
- High esthetics with integrated shade gradient

Available in VITA classical shades: A1, A2, A3, A3.5, B3, D3
Available in VITA SYSTEM 3D-MASTER Shade 0M1 (Bleach)

Smooth
Running
& Longer
Lasting

Diatit tools feature the advanced Diatit wear protection coating. This is a special material which is added into the surface of the bur after it has been produced. It hardens the tool surface and reduces the surface friction. Results in a smoother running and longer lasting bur.

DIATIT TUNGSTEN CARBIDE BURS

Material	Tungsten carbide	Diatit
REF	D200 KG 23	\$28⁹⁵
ISO-No.	509 104 200220 023	

D200 KG 23 for finishing of CoCr frameworks.

Application field	Plaster	Denture resin	Veneer resin	Precious metal/pd-based	CoCr denture/NPM	Ceramic
Working speed rpm	10-20,000	8-12,000	10-17,000	15-20,000	15-20,000	15-20,000

Material	Tungsten carbide	Diatit
REF	D237 KG 65	\$48⁵⁰
ISO-No.	509 104 237220 065	

D237 KG 65 excellent removal of material and smooth running for efficient processing of resin.

Application field	Plaster	Denture resin	Veneer resin	Precious metal/pd-based	CoCr denture/NPM	Ceramic
Working speed rpm	10-20,000	8-12,000	10-17,000	15-20,000	15-20,000	15-20,000

Material	Tungsten carbide	Diatit
REF	D263 KG 60	\$50⁹⁵
ISO-No.	509 104 263220 060	

Due to its shape and the coarse cut the D263 KG 60 is well suited for grinding of plaster dies..

Application field	Plaster	Denture resin	Veneer resin	Precious metal/pd-based	CoCr denture/NPM	Ceramic
Working speed rpm	10-20,000	8-12,000	10-17,000	15-20,000	15-20,000	15-20,000

Material	Tungsten carbide	Diatit
REF	D274 KG 60	\$53²⁵
ISO-No.	509 104 274200 060	

The D274 KG 60 is suitable for all materials due to this coarse cut.

Application field	Plaster	Denture resin	Veneer resin	Precious metal/pd-based	CoCr denture/NPM	Ceramic

Drufomat Scan

Very easy to handle high-end thermoforming unit with a maximum in user-friendliness and consistently precise final results. Built for all applications in dental thermoforming technology. Easy to use keypad, integrated bar code scanner identifies blanks and a working pressure of up to 6 bar. Additional safety factors for professional results. Two-hand operation and LEDs that light up when heating is in operation.

Highlights

- Perfect combination of technology, software and design
- Very easy operation
- High working-pressure for all applications
- Multi-functional professional unit

#D3300 \$6995.⁰⁰

Labormat SD

Sturdy boil-out unit from stainless steel for up to 12 flasks. Steplessly adjustable temperature from 65–95°C and manual regulation of spray times of up to 6 minutes. A user-friendly moment switch and an integrated handspray gun add to convenient operation. Also suitable for the polymerisation of hot polymers.

Highlights

- Robust, low-maintenance technology
- Simple and comfortable operation
- Housing: stainless steel

#D3601USA \$8350.⁰⁰

Polymax 5

Solid pressure polymerisation unit for cold and hot polymerisation of dental resins, that is receptive for one large articulator, three brass flask including clamp respectively 4 Castdon flasks with a 90 minutes timer. It has a temperature of up to 95 °C that can be adjusted continuously. The variably adjustable pressure make sure you will get perfect results. Can also be used as pressure compressor.

Highlights

- Solid and maintenance-free technique
- Automatic safety-sealing-systems
- Housing cover made of stainless steel
- External housing made of hard-wearing PU

NEW lay:art evo

Synthetic bristle brush

Renfert

lay:art evo is a state-of-the-art ceramic brush with bionic fibers. Thanks to the chemical composition of the fiber filaments and their specific processing, the brush bristles can absorb moisture and replicate the flame shape that is typical of high-end brushes. Together, both of these aspects demonstrate the characteristic management of moisture that previously made only natural bristles so unique. As a result, lay:art evo impresses with incredible dental product detail and pragmatic functionality.

ORIGINAL SIZE

Advantages

- Pioneering, high-end brush designed for modern ceramic layering techniques (e.g., micro-layering or full contour).
- Bionic fibers for precise layering and ecological sustainability.
- Refills in different sizes enable simple, cost-effective replacement of the brush tip.

Functional details

- Delicate tip with durable tension and elasticity impresses during targeted application of ceramic.
- The tension of the fine bristle tip adapts to usage and is maintained throughout layering.
- Unique moisture management thanks to innovative bionic fibers.
- Brush tip offers a significantly longer service life than conventional brushes.
- Brush handle in different sizes made from top quality anodized aluminum with smart ergonomics.
- State-of-the-art dental product with lifestyle, bionic fibers (protection of natural resources), and functional design.

Choice of two types of tips depending on the size: Flame and Cone
