Titan

Ceramic Nanohybrid

Optimized for full-arch provisionals, hybrid dentures, and denture teeth, Titan balances durability and fracture resistance to meet the demanding requirements of long-span restorations. Retaining the ceramic nanohybrid qualities of its predecessor, Titan incorporates a modified flexural modulus engineered for increased impact resistance, allowing it to absorb functional stress without compromising strength, stability, or esthetics.

HUGE NEW PRODUCT LAUNCH

The Next Generation of PMMA Excellence

Revolutionizing Dental Materials with Unmatched Performance

DuraPlex

DuraPlex, our latest innovation in dental materials, designed to elevate your practice with superior hardness, durability, and aesthetics. As **an advanced evolution of traditional PMMA**, DuraPlex sets a new standard for dental solutions, combining cutting-edge technology with proven reliability.

NEW
Product

HUGE NEW PRODUCT LAUNCH

Why Choose DuraPlex?

1. Enhanced Hardness & Strength

DuraPlex delivers exceptional mechanical properties, ensuring long-lasting performance for even the most demanding dental applications.

2. Superior Wear Resistance

Engineered to withstand daily wear and tear, DuraPlex maintains its integrity and appearance over time, reducing the need for frequent replacements.

Wear-resistant weight loss ratio% (84H, approx. 100,000 cycles)

3. Stain Resistance You Can Trust

DuraPlex retains the high-quality stain resistance of PMMA, ensuring a natural, aesthetically pleasing finish that your patients will love.

4. True Color System Compatibility

DuraPlex is fully compatible with the True Color System, offering perfect shade matching with MM4D zirconia shades. This makes it the ideal choice for full-arch implant restorations, delivering unmatched aesthetic results.

Colour Matching between PMMA and Zirconia ΔE

Same type of restoration, zirconia (undyed), resin blocks (polished only), enabling the combined use of Zirconia, PMMA and other products.

DuraPlex: Stronger. Smarter. Better.

FDA/CE/Health Canada approved

- Excellent aesthetics and transparency with hyperclear system-Reduces polishing and shortens finishing time
- High flexural & tensile Strength with optimum elongation
 - Ensures durability and flexibility, minimizing risk of breakage
- Anti-aging performance tested-Ensures long-lasting use with >98% accuracy and precise shrinkage control
- Biocompatible - Safe formulation without TPO, MMA & THF-MA, suitable even for sensitive patients

■ Resin printing consumption overview

Dental applications		Splint
Layer thickness / number		100 µm / 330 layers
Material consumption per splints		15 - 18 g
Quantity per bottle(1000 g)		55 - 66 splints
Printing time	AccuFab-F1 (HC)	52 min
	AccuFab-CEL (HC)	65 min
	AccuFab-L4D/L4K	108 min

■ Properties and features

Property	Value	Feature
Ultimate flexural strength	> 5 MPa	Durable and resilient, the material ensures reliable support under daily use while maintaining patient comfort
Flexural modulus	> 200 MPa	
Tensile strength	> 23 MPa	
Elongation at break (%)	> 90	

*Note: The above data meets ISO 20795-2, ISO 10477, ISO4049 , ISO 527 standards
