IPG

Intraoral Photogrammetry

SHINING 3D has introduced a groundbreaking innovation, Intraoral Photogrammetry Technology (IPG), revolutionizing precision and efficiency in dental implantology. This unique technology from SHINING 3D integrates photogrammetric scanning directly into intraoral procedures, enhancing the precision and efficiency of full-mouth edentulous implants, particularly in All-on-X procedures. IPG simplifies workflow and promises to elevate treatment outcomes by seamlessly combining intraoral scanning with advanced photogrammetry techniques, setting a new standard in dental care.

IPG + SCAN

Two-in-One System

High Precision

High Efficiency

Smooth scanning for edentulous cases

IPG technology ensures a seamless scanning experience for edentulous patients. Aoralscan Elite adopts the IPG tip, which is larger than standard, to capture every detail of the edentulous patient's oral geometry with unparalleled clarity.
